SEMINOLE TRIBE OF FLORIDA 401 WATER QUALITY CERTIFICATION

THIS CERTIFICATION is issued in conformity with the requirements of Section 401 of the Federal Water Pollution Control Act (33 U.S.C. 1341) and subject to Sections 3.6.8, 12.2.4, and 13.4.4 of the Seminole Tribal Water Code.

The Water Resource Management Department has reviewed the application submitted by the Seminole Tribe (Permit Application 19980062 IP-SS) to implement the Water Conservation Project on the Big Cypress Seminole Indian Reservation in cooperation with the U.S. Army Corps of Engineers and the Natural Resources Conservation Service and finds that the discharge of fill material associated with the design, construction and operation of this conservation project will not result in a violation of the Tribe's Water Quality Standards. Therefore, the Seminole Tribe of Florida certifies that the above described activity will not violate the applicable portions of Sections 301, 302, 303, 306, or 307 of the Federal Water Pollution Control Act, if designed, constructed, and operated as set forth in this application.

This the 20th day of April, 1998.
